Unveiling Success Factors in Original Video Content Creation: Insights from Industry Analysis

●●●

MAY 2023

Overview

In this Microsoft project, I am working towards specific objectives that aim to drive strategic decision-making in the realm of original video creation. The primary focus is on utilizing data analysis techniques to gain a comprehensive understanding of the video content landscape and the complexities associated with the industry. By leveraging data, I aim to extract valuable insights that can inform our strategies in entering and thriving in the competitive world of original video creation. Through this project, I seek to identify the production infrastructure, budget efficiency, industry recognition and strategic partnerships. The ultimate goal is to develop a successful video content creation strategy that sets Microsoft apart in the market.

Problem Statement

The problem at hand is that Microsoft aims to venture into original video creation and recognizes the importance of utilizing data analysis techniques to drive informed strategic decision-making. However, there is a lack of comprehensive understanding of the video content landscape and the complexities associated with the industry. This poses a challenge in effectively navigating the market, identifying opportunities, and developing a successful video content creation strategy. Therefore, there is a need to leverage data analysis to extract valuable insights that can address these challenges and guide Microsoft in entering and thriving in the competitive world of original video creation.

Defining the Metric for Success

Production Infrastructure

I will investigate the effectiveness of studios' production infrastructures in handling large-scale productions, managing multiple projects, coordinating production crews, streamlining post-production workflows, and embarking on diverse and ambitious film ventures.

Budget Efficiency

Here, I will be analyzing the relationship between the production budget, budget distribution, and the overall success of the movies in terms of profits, considering factors such as box office revenue.

Industry Recognition n Partnerships

I will investigate the achievement of industry recognition and the establishment of strategic partnerships within the video content creation space. This can be measured by awards, collaborations, and partnerships with renowned content creators, studios in relation to the production budget.

Extract Transform Load - ETL

I did a summary run down on my data using the following steps;

a) I integrated my data frames using the concatenation method.

b) I displayed the shape and type of my dataframe.

c) I dropped columns in this step.

d) I then went ahead and checked for duplicates.

e) I used the keep=False to keep all duplicates and sort_values to put duplicates next to each other.

f) Finally, I removed my duplicates.

Data Preparation:

The initial step is to ensure the cleanliness, consistency, and analysis readiness of the data. This involves addressing any inconsistencies in data, missing values, misspelled text data, outliers, imbalanced data, and invalid data. Furthermore, I will thoroughly examine the data for any inconsistencies or discrepancies, resolving them through appropriate data transformation or cleaning methods. If required, I will also consider converting data types to their appropriate formats for accurate analysis.

Stakeholder and Key Business Questions

- 1) How to gain insights into how other industry players are performing?
- 2) What are the benefits of industry recognition and the establishment of strategic partnerships?
- 3) How production budgets are distributed?

Market Trends Worth Monitoring

High-Quality Productions

- There is a growing emphasis on producing high-quality original content that stands out in a competitive market. Studios are investing in top-notch talent, production values, and cutting-edge technology to deliver visually stunning and engaging content. From the top profitable movies, I will use the examples of the movies Avatar and the Marvel Studios Franchises.

Collaboration and Partnerships

- Movie studios are collaborating with established production companies, talent agencies, and creative professionals to enhance their content creation capabilities. An example of strategic partnerships in the context of Fox Studios is their collaboration with Marvel Studios for the production of the "X-Men" film series. Fox Studios joined forces with Marvel Studios to create successful films based on the popular X-Men characters.
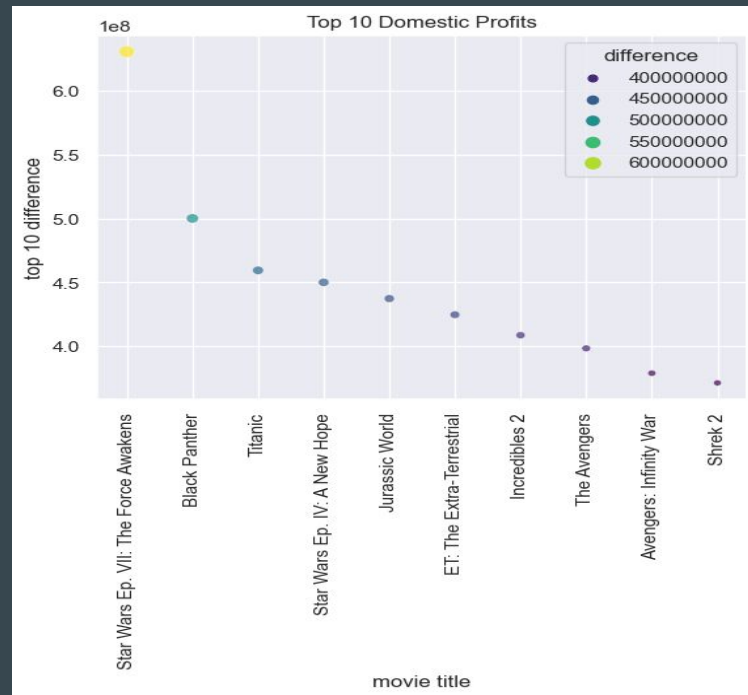

Financial Feasibility

Findings

A positive correlation between the production budget of a movie and its resulting profits.

Client Implications:
- Based on my analysis, one key implication for our clients is that higher production budgets tend to result in higher profits.
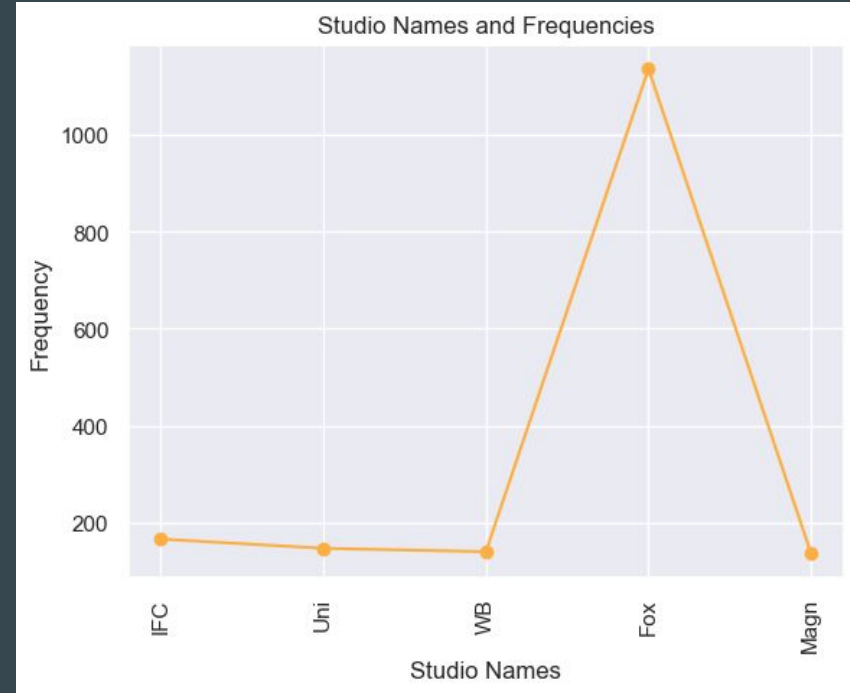

Production Infrastructure

Findings

The top 5 studios in the world right now are IFC Films, Universal Studios, WarnerBros, Fox, Magnate.

Client Implications:
● A robust production infrastructure allows studios to handle large-scale productions

Studio Names and Frequencies

# Industry Recognition and Partnerships

Findings

Emphasizes the importance of strategic collaborations and financial planning

Client Implications:
- My analysis reveals the significant advantages of allocating a higher production budget.
Correlation Analysis

Findings

A correlation coefficient of -0.79 suggests a strong negative correlation between the 'count' and 'year' variables in the given dataset.

Client Implications:

- There has been a decreasing trend in the counts of movies produced by the top studios.

Correlation between Year and Count

Conclusion

Through a comprehensive analysis,

a) I have uncovered key insights regarding the potential return on investment and the significance of a robust production infrastructure for movie studios.

b) The research emphasizes the value of strategic collaborations and financial planning in the pursuit of original video content creation.

c) A robust production infrastructure empowers studios to handle large-scale projects

d) Incorporating correlation analysis into the broader examination of industry trends, partnerships, and budgets offers a comprehensive understanding of the challenges and opportunities faced by movie studios

These insights will guide Microsoft in making informed decisions and developing effective strategies as they embark on their journey into original video content creation.
